

Solutions for enabling cross-border data flows

WHEN 7 November 2012 • 14.30-16.00 **WHERE** Workshop room 6

What are the challenges and potential solutions for enabling data flows across borders?

Led by a multistakeholder panel, this workshop is an opportunity to join a lively discussion on the intricacies faced by a range of stakeholders including business, governments, law enforcement agencies, Internet technical community and civil society on these issues.

Issues up for examination include data sharing across borders and the relationship between privacy and the free flow of information.
