

# Business Law in China

Trade, Investment, Operations and Finance

Second, Revised Edition

EDITED BY DANIEL A. LAPRÈS AND ZHANG YUEJIAO

**B**usiness Law in China brings together practitioners and scholars from China and other countries to create a unique work of compilation, analysis and assessment of the current state of Chinese business law. With a focus on traditionally important subjects for international business professionals, this updated edition breaks ground with its inclusion of extensive material on the legal aspects of managing a business in China. It is organized and presented to correspond with business people's actual experience in dealing with legal issues involving China.

Throughout the work, legal issues are placed in their business contexts, creating a basis for common understanding among lawyers and their business clients. Tables and illustrations help to clarify complex institutional organisations and legal processes.

## Table of Contents

"ICC's conviction that trade is a powerful force for peace and prosperity dates from our organisation's origins in 1919. The publication of this authoritative and comprehensive guide to Chinese business law is an excellent example of how we translate that conviction into practical tools and services for business people to use in today's globalized world.

As one of the world's biggest national economies in the 21st century, China presents extraordinary opportunities for business. Understanding China's complex legal system, economic laws, and ongoing reforms is key to unlocking the doors to those opportunities. Written by some of the world's foremost experts, Business Law in China is essential reading for anyone doing business in China."

Victor Fung, Chairman,  
International Chamber of Commerce

# Business Law in China

## Trade, Investment, Operations and Finance

The book is intended to be used by practitioners, academics and business people.

Its treatment of Chinese business law is unique for the breadth of its scope, for the diversity of the national origins and professional viewpoints of its authors, for the organisation of the material to reflect the stages of business development in China, and for the use of economic data to explain and illustrate legal norms.

Whereas the rapid development of Chinese law quickly renders printed works out-of-date, this book's electronic format permits frequent updates.

Because of the book's electronic format, bouquets of chapters organized by themes can be purchased for reduced prices:

- ◆ Introduction to the Legal Environment for Doing Business
- ◆ International Trade and Marketing
- ◆ Operating a Business
- ◆ Finance
- ◆ Dispute Settlement
