**PLEASE JOIN US FOR INTERNATIONAL CHAMBER OF
COMMERCE SIDE EVENT ON**

Technology Development and Deployment to address Climate Change

**Monday 6 April 18:00 - 20:00 • Salon König located on the first floor of the
Hotel Maritim (event will be webcast)**

With a rise in global population from 6.5 to 8 billion, a 50% increase in energy demand and a doubling of economic output in the next 25 years, it is critically important to marshal the necessary technological resources to address sustainability challenges and increase the pace of technological innovation, cooperation and dissemination. Business is the primary source of innovation and, provided with the right enabling framework, is a critical actor in the development, commercialization and dissemination of technology. The event will explore how business makes long-term investment decisions particularly in the deployment of low-carbon technologies

MODERATOR: Nick Campbell, Chair ICC Task Force on Climate Change

PANELISTS:

Thaddeus Burns, Senior IP Counsel, General Electric

John Scowcroft, Head of Environment and Sustainable Development, EURELECTRIC

Eduardo Reyes, Sub-Administrador General, ANAM Panama

Professor Zou Ji, Head of the Environment Protection School at Renmin Daxue, the People's University of China and advisor to the Chinese government

REFRESHMENTS WILL BE PROVIDED
